## SECTION 02 - HAZARDS IDENTIFICATION

### WHIMS CANADA

- Skin corrosion/irritation - Skin corrosion - category 1A
- Serious eye damage/eye irritation - Eye irritation - category 1
- Oxidizing liquids - category 2
- Specific target organ toxicity - Single exposure - category 3

### PICTOGRAMS

### Signal Word

DANGER

### Hazards statements (H)

- Causes severe skin burns and eye damage
- Causes serious eye damage
- May intensify fire; oxidizer
- May cause respiratory irritation

### Precautionary statements (P)

- Do not breathe mists, gases, vapors and other fumes, or the product itself.
- Wear protective gloves (nitrile, butyle, neoprene), protective clothing and eye and face protection.
- IF SWALLOWED: Rinse mouth. Do NOT induce vomiting.
- IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse with water.
- IF INHALED: Remove to fresh air and keep at rest in a position comfortable for breathing.
- Immediately call a POISON CENTER or a physician.
- IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
- Store locked up.
- Dispose of contents and container in accordance with local, regional and national regulations, or contact a specialist waste disposal company.
- Keep away from heat, sparks, open flames, hot surfaces. — No smoking.
- Keep away from clothing and combustible materials.
- In case of fire: Use water (not dry agents) to extinguish.
- Use only outdoors or in a well-ventilated area.
- Call a POISON CENTER or a doctor or if you feel unwell.
- Store in a well ventilated place. Keep container tightly closed.

### Other dangers

## SECTION 03 - COMPOSITION/INFORMATION ON INGREDIENTS

| Component         | No. CAS   | % Weight |
|-------------------|-----------|----------|
| Hydrogen peroxide | 7722-84-1 | 34-38%   |

## SECTION 04 - FIRST AID MEASURE

|                                                                        |                                                                                                                                                                                               |
|------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Eye contact</b>                                                     | Wash eyes with large amounts of water for at least 15 minutes while holding eyelids apart to rinse eyes. If irritation persists, seek medical attention.                                      |
| <b>Skin contact</b>                                                    | Wash skin with plenty of water for at least 15 minutes. Remove contaminated clothing. If irritation persists, seek medical attention.                                                         |
| <b>Inhalation</b>                                                      | Move the unwell person to the fresh air. If breathing is difficult, give oxygen. Consult a physician.                                                                                         |
| <b>Ingestion</b>                                                       | If the person is conscious, give water to drink. Do NOT induce vomiting. Never give anything by mouth to an unconscious person. Consult a physician.                                          |
| <b>Most important symptoms and effects (acute and delayed)</b>         | Main symptoms of high exposure: Skin whitening. Tingling. Skin irritation. Eyes irritation. Chemical burns of the skin, eyes and respiratory and digestive mucous membranes. Ref. section 11. |
| <b>Immediate medical attention and special treatment, if necessary</b> | Treat according to symptoms. Show this sheet to the attending physician.                                                                                                                      |

## SECTION 05 - FIREFIGHTING MEASURES

|                                                                      |                                                                                                                                                                                                                                                                                                                |
|----------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Suitable extinguishing media</b>                                  | Use water to extinguish the fire.                                                                                                                                                                                                                                                                              |
| <b>Unsuitable extinguishing media</b>                                | Do not use dry chemical. Do not use foams. CO2 or halon can provide limited control.                                                                                                                                                                                                                           |
| <b>Combustion products</b>                                           | Hazardous combustion products formed under fire conditions: Hydrogen. Oxygen.                                                                                                                                                                                                                                  |
| <b>Specific hazards of the dangerous product</b>                     | Powerful oxidizer. Contact with combustible products may cause fire. In the event of a fire, the water in the solution will evaporate, and the oxidizing base product will fuel the fire. Containers exposed to fire or its heat may explode. May react violently with incompatible products (Ref Section 10). |
| <b>Special protective equipment and precautions for firefighters</b> | Discard incompatible substances if this can be done without risk. Firefighters should be equipped with standard protective equipment, fireproof clothing, face mask, gloves, protective boots and, where appropriate, self-contained breathing apparatus.                                                      |

## SECTION 06 - ACCIDENTAL RELEASE MEASURES

|                                                                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
|--------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Personal precautions, protective equipment and emergency measures</b> | Evacuate personnel to safe areas. Recommended distance: at least 50 meters (150 feet) for liquids and at least 25 meters (75 feet) for solids. Cut off all sources of ignition. Keep combustibles (wood, paper, oil, etc.) away from spilled material. Avoid breathing in vapours, spray mists or gases. When handling, wear appropriate safety equipment (reference Section 8 for protective equipment to be used). Ensure a good ventilation. Use NIOSH cartridge respiratory protection if necessary or for larger spills. |
| <b>Methods and materials for containment and cleaning up</b>             | Absorb the product with sand or vermiculite. Dilute residues with water, clean and rinse. Dispose of residues in a container for disposal of hazardous materials. Do NOT use combustible absorbents. Discharge into the environment must be avoided.                                                                                                                                                                                                                                                                          |

## SECTION 07 - HANDLING AND STORAGE

|                                    |                                                                                                                                                                                                                                                                                                                                                                            |
|------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Conditions for safe storage</b> | Store in a cool, dry, and well-ventilated place. Keep container tightly closed and store away from heat, water, moisture, and incompatible products (ref. section 10). Do not store in metal containers. Protect from the sun's rays. Use a vented cap to allow pressure to escape.                                                                                        |
| <b>Methods of handling</b>         | Avoid contact with eyes, skin and clothing. Avoid ingestion and inhalation. Avoid grinding or heat the product in the presence of combustible and organic materials. Wear personal protective equipment (ref. section 8) when handling. Always ensure good ventilation. Apply the usual standard hygiene rules: Wash your hands after use. Do not eat or drink during use. |

## SECTION 08 - EXPOSURE CONTROLS/PERSONAL PROTECTION

### WORKPLACE CONTROL PARAMETERS

| Component         | CAS-No.                                                                                                                                | Control parameters | Value              | Basis                                                                                                                                   |
|-------------------|----------------------------------------------------------------------------------------------------------------------------------------|--------------------|--------------------|-----------------------------------------------------------------------------------------------------------------------------------------|
| Hydrogen peroxide | 7722-84-1                                                                                                                              | TWA                | 1ppm<br>1.4mg/m3   | Canada. **Data origin** Sigma-Aldrich (Millipore Sigma)

**Gloves** Handle with protective gloves. Suggested material: Nitrile. Butyl. Neoprene. The type, thickness and length of the glove must be chosen according to the use, the concentration of the product, as well as the duration of use. Replace gloves regularly for better protection.

**Eyes** Safety goggles with safety shutters.

**Shoes** Use safety shoes.

**Clothes** Labcoat. The type of protective equipment must be selected according to the concentration and amount of the dangerous substance at the specific workplace.

**Engineering control** Use fan. Have safety showers and eyewash stations in the workplace in case of an emergency and a ventilation system to maintain the level of concentrations in the air below the exposure limit values.

|--------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Routes of exposure</b>                        | Ingestion, inhalation, skin and eye contact.                                                                                                                                                                                                                     |
| <b>Acute exposition effects / symptoms:</b>      | By exposure route below.                                                                                                                                                                                                                                         |
| - Eyes                                           | Irritation. Severe burns and destruction of ocular tissue that can lead to corneal ulceration and blindness.                                                                                                                                                     |
| - Skin                                           | Irritation. Skin whitening. Tingling. May cause: Formation of vesicular lesions.                                                                                                                                                                                 |
| - Inhalation                                     | Spasms. Irritation and inflammation of the nose, throat and lungs. Chemical pneumonitis. Cough. Breathing difficulties. Edema of the larynx and bronchi. Pulmonary edema. Symptoms may be delayed. Can lead to death.                                            |
| <b>Acute toxicity (Ingestion)</b>                | Corrosion and ulceration of the mouth, throat, esophagus, stomach and abdominal wall. Burning of the mouth, throat, esophagus and abdominal wall. Possible death.                                                                                                |
| <b>Chronic exposure effects / symptoms</b>       | Burning sensation. Dermatitis. Conjunctivitis. Nervous disorders. Liver and kidney damage. Chest pain. Cough. Dyspnoea. Tearing. Headache. Dizziness. Tearing. Erythema. Fatigue. Irritability. Weight loss. Loss of appetite. Nausea and vomiting. Convulsions. |
| <b>DL50 (specify species and route of entry)</b> | ETA Mix (Estimated Acute Toxicity): LD50 Oral - Rat - ~1980-2000mg/kg. LD50 Dermal - Rabbit - >5000mg/kg.                                                                                                                                                        |
| <b>CL50 (specify species and route of entry)</b> | ETA Mix (Estimated Acute Toxicity) >5000mg/m³.                                                                                                                                                                                                                   |

## SECTION 12 - ECOLOGICAL INFORMATION

### HYDROGEN PEROXIDE 30-35%

|                                      |                                                                                                                                                                                                                                  |
|--------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Ecotoxicity</b>                   | Toxicity to fish: LC50 - Oncorhynchus mykiss (rainbow trout) - 22 mg/l - 96 h (Hydrogen peroxide) . Toxicity to daphnia and other aquatic invertebrates: EC50 - Daphnia magna (Water flea) - 24 mg/l - 48 h (Hydrogen peroxide). |
| <b>Persistence and degradability</b> | Readily biodegradable                                                                                                                                                                                                            |
| <b>Bioaccumulative potential</b>     | Accumulation is not expected.                                                                                                                                                                                                    |
| <b>Mobility in soil</b>              | Probable mobility in the environment due to its solubility in water.                                                                                                                                                             |
| <b>Other adverse effects</b>         | An environmental hazard cannot be excluded in the event of unprofessional handling or disposal. Harmful to aquatic life. Causes long-term adverse effects.                                                                       |

## SECTION 13 - DISPOSAL CONSIDERATIONS

|                               |                                                                                                                                                |
|-------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Waste Disposal Method</b>  | Dispose of contents and container in accordance with local, regional and national regulations, or contact a specialist waste disposal company. |
| <b>Contaminated Packaging</b> | Dispose of as unused product.                                                                                                                  |

## SECTION 14 - TRANSPORT INFORMATION

|                            |                                                                                |
|----------------------------|--------------------------------------------------------------------------------|
| UN Number                  | 2014                                                                           |
| UN Proper shipping name    | PEROXYDE D'HYDROGENE EN SOLUTION AQUEUSE contenant entre 20 et 60% de peroxyde |
| Transport hazard class(es) | Matières comburantes 5.1<br>Matières corrosives 8                              |
